

**PROTEIN WITH ACTIVITY OF HYDROLYZING AMYLOPECTIN, STARCH,
GLYCOGEN AND AMYLOSE, GENE ENCODING THE SAME, CELL
EXPRESSING THE SAME, AND PRODUCTION METHOD THEREOF**

Abstract of the Disclosure

Disclosed are an enzyme, having the amino acid sequence of SEQ. ID. No. 1 with the activity of hydrolyzing amylopectin, starch, glycogen and amylose, a gene encoding the enzyme, and a transformed cell expressing the gene. Also disclosed is a method of producing an enzyme capable of degrading amylopectin, starch, glycogen and amylose, which comprises culturing the cell, expressing the enzyme in the cell and purifying the enzyme. A composition comprising the enzyme is provided for removing dextran or polysaccharide contaminants during sugar production.
